

Telecom Review continued its dedication and commitment to the ICT industry and exceeded all expectations by holding the best and largest high-level executive ICT gathering. The Telecom Review Excellence Awards, held on Dec. 6, recognized industry leaders for their efficient and hard work in 2017, and are a special way for Telecom Review to help celebrate the winner's success.

At the Leaders Summit Nokia was honored with the award for the Best Chip Maker/Developer. Their FP4 is the result of years of engineering and research and leverages the latest advances in silicon. Their FP4 and PSE-2 are the result of years of engineering and research and leverage the latest advances in silicon for IP and optical networks.

This year there were 302 nominations for the Telecom Review Excellence Awards. Telecom Review wants to thank all of the judges who worked tirelessly on reviewing and judging the nominees. Winners were chosen based on recognized and demonstrated capabilities in their specific sector by an independent panel of 15 experienced industry veterans.

Commenting on the gathering of Industry Leaders, Jeff Seal, Managing Partner of Telecom Review North America noted, "Once again Telecom Review has brought together the leaders of the ICT/telecom industry."
