

In this age of smart phones one of the biggest issues for users is the protection and maintenance of the devices so that you may get your money's worth for these expensive phones. There are many players in this field but one that stands out for its quality is Qmadix.

With the explosion in the growth of I Phone users we found one that produces quality accessories. **Qmadix Inc.** is a leader in tech gadgets and accessories. Founded by a team of dedicated leaders with over 20 years of success in the accessory industry, their long-standing commitment to providing quality products and innovative solutions has always been, and remains, the cornerstone of the Qmadix philosophy.

The Qmadix brand offers a level of quality and attention to detail that is hard to find in the industry. Being a true manufacturer that designs and tools its own products has enabled them to be the leader in first-to-market accessories for new handset launches, as well as offering contract manufacturing to the Original Equipment Manufacturers (OEM). They service a multitude of channels, including Mobile Network Operators, Authorized Agents, Distributors, National Retailers, and on line distributors. With a deep understanding of each one of these sectors of the market, Qmadix has become "the solution".

They continue to evolve with new ideas in technology, products, and services, reinventing solutions for the accessory industry by proposing new custom programs, competitive pricing, and quality products backed by outstanding customer care.

One product that can be used with the I Phone is the **Qmadix Xtreme Protective Carrier. This case** integrates innovative design and engineering to give you the ultimate defense against unforeseen drops. It has detailed stitching on the attractive leather-like exterior, combined with a soft suede-like interior, which provides a classy alternative to other cases. This protective carry solution provides maximum protection with a dynamic blend of shock absorption material for your I Phone. It has a business like look while at the same time using protective, heavy-duty molded rubber, durable, reinforced nylon panels, and a magnetic flap closure. Unlike other devices the magnetic closure continues to function after multiple uses, which is certainly a breath of fresh air in this market space!
